

RAHA · OPERATIONS GUIDE

Admin Panel Management Manual

A practical guide for managing projects, property media, enquiries, website content, careers, users, and site settings.

Version 1.0 · September 2026

For authorized Raha administrators and content managers

Contents & Getting Started

1. Login and navigation

2. User roles and permissions

3. Project setup sequence

4. Project gallery and floor plans

5. Brochure management

6. Apartments and inventory

7. Construction progress

8. Sales and CRM

9. Website content

10. Blogs, newsletters and careers

11. Site settings

12. Publishing checklist

Admin URL: `http://localhost:3000/admin-dashboard`

Login URL: `http://localhost:3000/login`

On a deployed website, replace `http://localhost:3000` with the live domain. Never share an administrator password or access token.

Login

1 Open the login page and enter your authorized account credentials.

2 After successful login, open **Admin Dashboard**.

3 Use the left sidebar to expand a management group.

4 Use **View website** ↗ to verify public changes.

5 Use the sign-out icon when finishing your session.

Security: Use a unique password, do not save credentials on a shared device, and always sign out after administrative work.

Roles, Permissions & Navigation

Area	Typical access	Purpose
Property management	Project Manager / Super Admin	Projects, types, apartments, inventory, amenities, locations, media and progress.
Sales & CRM	Sales / Support / Super Admin	Enquiries, meetings, landowners and customer messages.
Website & content	Content Admin / Super Admin	Homepage, sliders, page sections, testimonials, team, newsletters and blogs.
Careers	Content Admin / Super Admin	Job openings and received applications.
System administration	Super Admin / permitted users	Brand settings, accounts, roles and permissions.

Standard record controls

- **Create/Add:** opens a blank management form.
- **Edit:** opens an existing record and preserves uploaded files unless replaced or cleared.
- **Delete:** removes a record; confirm the correct record before proceeding.
- **Active:** controls operational availability.
- **Publishing:** controls whether public content is draft, published or archived.
- **Display order:** lower numbers normally appear first.

Menus are permission-aware. If a section is missing, ask a Super Admin to review the account's role and permissions.

Creating a Project — Correct Sequence

1. Prepare related records

Before creating a project, confirm its **Property Type**, **Division**, **District**, **Area**, and **Amenities** exist. Create missing values under Property Management.

2. Create the project

- 1 Go to **Property Management** → **Projects** and choose Add/Create.
- 2 Enter Name, unique Slug, unique Code, short description and full description.
- 3 Select property type, project status and **DRAFT** publishing status.
- 4 Select Division, District and Area in that order; then choose amenities.
- 5 Enter address, Google Maps URL and coordinates if available.
- 6 Enter land/building data, apartment counts, size range, price range and currency.
- 7 Set construction and handover dates.
- 8 Upload Featured Image, Hero Banner, Features Image and Enquiry Image as required.
- 9 Upload the Brochure PDF, add video/tour URLs, display order and SEO fields.
- 10 Enable Active, save, then reopen the record and confirm all values.

Important: The project must be saved before gallery images, apartment types, units or construction updates can be attached to it.

Project Fields Reference

Field group	What to enter
Identity	Name, URL-friendly slug, unique internal code, short and full descriptions.
Status	UPCOMING, ONGOING, READY or HANDED_OVER. Keep new records in DRAFT until complete.
Location	Division → District → Area, address, Google Maps URL, latitude and longitude.
Building	Land size, road width, buildings, floors, basements, apartment count and apartments per floor.
Commercial	Minimum/maximum apartment size, minimum/maximum price and currency.
Media	Featured image for listing cards; hero banner for details; features and enquiry images; PDF brochure.
Marketing	Features label/title, enquiry title/description, video URL and virtual tour URL.
Visibility	Display order, Featured, Active and publication status.
SEO	Search title, description and keywords using natural, project-specific language.

Slug example: Project “Arcadia Grove” should use `arcadia-grove`. Use lowercase letters and hyphens; do not use spaces.

Gallery Images & Floor Plans

Add an image to a saved project

- 1 Go to **Property Management** → **Media gallery**.
- 2 Choose Add/Create and select the saved project.
- 3 Select the media Type.
- 4 Upload an image, or supply an external URL when appropriate.
- 5 Add a useful Caption and Alternative Text.
- 6 Set Display Order and save.
- 7 Repeat for each image and verify the project details page.

Type	Use
EXTERIOR	Building façade, entrance and outside views.
INTERIOR	Living, bedroom, kitchen and common interior spaces.
CONSTRUCTION	Site and construction-stage photographs.
ARCHITECTURAL	Renderings, elevations and architectural details.
FLOOR_PLAN	Apartment and floor plan images; shown in the project gallery/plans area.
VIDEO	Video-related record using a suitable URL/thumbnail workflow.
VIRTUAL_TOUR	Interactive or external virtual-tour destination.

Recommended: Use consistent landscape dimensions, optimized file sizes, descriptive alt text, and orders such as 10, 20, 30 so images can be inserted later.

Brochure & Price-Enquiry Workflow

Upload or replace a brochure

- 1 Go to **Property Management** → **Projects**.
- 2 Edit the required project.
- 3 Find **Brochure PDF**, choose the PDF, and save.
- 4 Open the public project page and choose **Download Brochure**.
- 5 Submit the lead form, verify the confirmation, PDF viewer, new-tab viewer and download.

The public project actions appear in this order:

- Brochure requests are saved as enquiries.
- If no PDF is uploaded, the lead is still recorded and the visitor is told a consultant will provide it.
- Unlock Price records a price request and offers a project-specific WhatsApp continuation.
- The WhatsApp destination uses the number/link configured under Site Settings.

Upload PDF files only. After replacement, hard-refresh the public page if the previous document remains cached.

Apartments, Units & Construction

Apartment types

- 1 Open **Property Management** → **Apartment types**.
- 2 Select the parent project.
- 3 Enter the apartment configuration, size and supporting floor-plan information.
- 4 Save and verify it appears in the project overview.

Units & inventory

- 1 Open **Units & inventory** and select the correct project and apartment type.
- 2 Enter unit/floor identifiers and availability information.
- 3 Update inventory promptly when reservation or sales status changes.

Construction progress

- 1 Open **Construction progress** and select the project.
- 2 Add the progress date, completion percentage, title and description.
- 3 Save; the latest progress percentage is used on the project page.

Keep completion percentages factual and approved. The newest progress record should represent the current public status.

Sales & CRM

Section	Action
Enquiries	Review brochure, price and property enquiries; assign ownership, update status, follow-up date and internal notes.
Meeting requests	Review consultation requests, preferred dates and contact details; update status after scheduling.
Landowner proposals	Review submitted land information and contact the owner through the approved process.
Customer messages	Review contact, feedback and suggestion messages; mark resolved after action.

Suggested enquiry lifecycle

- Do not delete valid leads merely because they are completed.
- Keep internal notes professional and factual.
- Avoid storing unnecessary sensitive information.
- Assign follow-up dates and update status after every meaningful interaction.

Website & Content Management

Menu	Purpose
Campaign announcements	Schedule homepage campaigns with title, optional description/image, CTA, start/end time, priority and active state.
Homepage content	Manage structured homepage copy and content blocks.
Homepage sliders	Manage desktop/mobile hero imagery, titles, links, order and activation.
Page headers	Manage page-specific heading labels, titles and hero presentation.
Page sections	Manage reusable content sections and their display order.
Testimonials	Manage customer quotes, identity, image, order and visibility.
Team members	Manage profiles, roles, biographies, photos and ordering.
Newsletter issues	Manage issue title, cover/document and publication details.
Blogs / categories / tags	Create taxonomy first, then publish categorized and tagged posts.

Preview after every content update. Check desktop and mobile layouts, spelling, links, image cropping and heading length.

Careers, Settings & Users

Careers

- Create and publish Job Openings with accurate requirements, location and deadline.
- Review Applications from the Applications section.
- CV files contain personal information—download and share only with authorized staff.

Site settings

- Company name, logo and favicon.
- Hotline, email, office address and business hours.
- Footer content and public navigation labels.
- Social links, including the full WhatsApp link such as <https://wa.me/8801...>
- Default SEO title and description.
- Contact-page images and field labels where available.

Users, roles and permissions

- Create individual accounts; never share a single administrator account.
- Grant only the permissions required for the person's work.
- Remove or disable access immediately when responsibilities change.
- Reserve Super Admin access for trusted system administrators.

Publishing & Quality Checklist

- ☐ Project name, slug and code are correct.
- ☐ Status and publishing state are correct.
- ☐ Location hierarchy is correct.
- ☐ Address and map open correctly.
- ☐ Building and apartment figures are accurate.
- ☐ Price values and currency are approved.
- ☐ Dates are accurate.
- ☐ Featured and hero images load.
- ☐ Gallery order is correct.
- ☐ Floor plans open clearly.
- ☐ Brochure opens and downloads.
- ☐ Consultation form submits.
- ☐ Unlock Price opens WhatsApp.
- ☐ Mobile layout has been checked.
- ☐ SEO text is complete.
- ☐ Spelling and punctuation are reviewed.

Troubleshooting

Problem	Resolution
New project missing from gallery dropdown	Save the project first, confirm it is active, then reload Media Gallery.
Brochure button has no PDF viewer	Edit the project, upload a valid PDF under Brochure PDF, save, and refresh.
Public changes are not visible	Confirm Published and Active, save, then hard-refresh with Ctrl/Cmd + Shift + R.
Admin menu is missing	Ask a Super Admin to review role permissions.
Image looks cropped	Use the recommended aspect ratio and reposition/crop the source before upload.
WhatsApp opens the wrong number	Correct the WhatsApp link and hotline under Site Settings.
